

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## ADVERTISEMENT.

IT was not the intention of the publishers, when they presented their *first* Catalogue, in the fall of 1817, so soon to appear with a *second*; the labour of compilation alone being sufficient to deter them from a very early repetition. The rapid sale, however, of many of the most valuable works; the purchase of an extensive collection, made by an able scholar, during a tour of health in Europe; together with the continual accessions which they were receiving from various quarters, obliged them again to give their Catalogue to the public.

The plan of the former one has been adopted; and the compiler can only regret that he has fallen short of his intention, in giving the character of a greater variety of authors; but the labour is too great to be accomplished in one or two years. At the same time he does not wish to conceal that his intention is to give a Catalogue *raisonné* of the most esteemed authors, in every department and in every language. In doing this he shall avail himself of all the aid within his power, whether from the works of the illustrious dead, or the learned living. So much attention has, of late years, been paid to the study of *bibliography*, and so many able works from *Mattaire* down to the present phalanx of *bibliographers*, have been written, as very much to have smoothed the path of the present and future student: still, it requires extensive research, which some degree of leisure and much time and care can alone accomplish. How much of either will be afforded to the present compiler, must depend on circumstances which no human foresight can control; but he pledges himself, under all circumstances, excepting the loss of health, never to lose sight of his first object.

The books in the present Catalogue are given as bound, unless otherwise mentioned. Those of old dates are mostly in old bindings, but, in general, in fine order. In the Classical, and Latin and Greek Theological departments, every care has been taken to collect the

most approved editions ; and there will be found some articles, which the best European Catalogues cannot furnish. To these the attention of the learned and the curious is particularly called.

In the collection of Mathematical Works they have been assisted by a gentleman of extensive science, who is thoroughly acquainted with every mathematical writer for the two last centuries ; their collections under this head are not inconsiderable—but they present them only as the beginning. In a short time they hope to possess one copy, at least, of every distinguished writer in this important science.

To the collection of History and Theology the proprietors have devoted much of their attention. The Catalogue will show what they have done already ; and their arrangements are now such as to enable them very much to enrich these departments. They have on the way, from different parts of Europe, from 1500 to 2000 articles, a Supplementary Catalogue of which shall be given, when the book has arrived, and have been arranged for that purpose.

Orders, as heretofore, will be executed according to the date of their receipt ; and should any books, ordered, be sold, the person shall be entitled to the first copies which are received. This will be strictly adhered to.

The proprietors take this opportunity of returning their thanks to public institutions, as well as to private gentlemen, not only for their warm approbation of the present plan, expressed in the most handsome terms, but also for the patronage which they have received ; and they request a continuance of their favours on the same liberal principles which have hitherto distinguished them. Orders by mail from any part of the United States, will meet instant attention ; and they will import, from Great Britain and any part of the Continent of Europe, any number of books, whether *one*, or *more*, as suit the purchasers. Orders also for *Periodical Works*, from London and Paris will be regularly attended to.

This is a very beautiful copy of this rare edition: one similar to which is seldom to be met with.

The character of Chrysostom, by Fenelon, is too correct to be passed over. "All his discourses," says the Archbishop, "tend to persuasion; he placed every thing with judg-

ment; and was well acquainted with the Holy Scriptures, and the manners of men. He entered into their hearts, and rendered things familiarly sensible to them. He had sublime and solid notions; and is sometimes very affecting."

QUARTO.

1989 **BAXTER'S** (J.) *Inquiry into the Nature of the Human Soul*, half bound, stained, *scarce*, \$1 75 *Lond.*

1990 Boyle's (Robert, Esq.) *Philosophical Works*, abridged and methodized under general heads, by Peter Shaw, M.D. 3 vols. good copy, \$9 *Lond.* 1725

"This extraordinary man was designed by nature to succeed to the labours and inquiries of Lord Bacon. By his experiments he, in a great measure, filled up those plans and outlines of science which that mighty genius had sketched out."

"Which of Mr. Boyle's writings," says Dr. Boerhaave, "shall I recommend? All of them. To him we owe the secrets of fire, air, vegetables, fossils: so that from his works may be deduced the whole system of natural knowledge."

1991 Coake's (N., Esq.) *Creed Philosophic, or Immortality of the Soul*, stitched, \$1 50 *Lond.* 1813

1992 Colquhoun's (P., LL.D.) *Treatise on the Wealth, Power, and Resources of the British Empire, in every Quarter of the World, including the East Indies*, illustrated by copious Statistical Tables, second edition, royal quarto, boards, \$14

*Lond.* 1815

1993 Philadelphia Philosophical Society, *Transactions of*, from 1769 to 1786, inclusive, 2 vols. calf gilt, \$5 *Philad.* 1771—1786

1994 Sadler, (Sir Ralph, Knight-Banneret) *State-Papers and Letters of*, edited by Arthur Clifford, Esq. with a *Memoir of the Life of Sir R. Sadler*, and *Historical Notes*, by Walter Scott, Esq. fine head, and other plates, 2 vols. boards, \$17 *Edinb.* 1809

"A variety of circumstances concur in giving a great degree of importance to these interesting volumes. The period to which they relate; the transactions of that period;

the abilities which Sir Ralph Sadler is known to have possessed ; and the confidence that was reposed in him by Henry VIII. by the court of Edward VI. and by Queen Elizabeth, all conspire to make these letters peculiarly valuable to every one who wishes to be thoroughly acquainted with the British History, Scottish as well as English, at the era of the Reformation. An additional value is given to them by Mr. Scott's Memoir of the Life of the great statesman, which will serve as a guide to those who, though they have not leisure to read the whole collection, may yet wish to consult these curious papers with respect to some particular event in our national history." *British Critic*.

1995 Smith's (Adam, LL.D.) *Essays on Philosophical Subjects, with the Life of the Author*, by Dugald Stewart, LL.D. &c. calf, \$4 *Lond.* 1795

1996 Wadstrom's (C. B.) *Essay on Colonization ; particularly applied to the Western Coast of Africa, with some free Thoughts on Cultivation and Commerce ; also, brief Descriptions of the Colonies already formed or attempted, in Africa, including those of Sierra Leona and Bulama. In II. Parts, illustrated with a Nautical Map, and other plates*, 2 vols. boards, \$4 *Lond.* 1794

This work is peculiarly interesting at the present moment, when so much attention has been called to the colonization of the Blacks. Mr. Wadstrom made his voyage under the patronage of the king of Sweden, for the express purpose of observing the natives of Africa in their rude state. On his return he was examined by the British privy council, on the plan then under their consideration.

1997 Whitelock's (Lord Commissioner Bulstrode) *Journal of the Swedish Embassy in the Years 1653 and 1654, from the Commonwealth of England, Scotland, and Ireland, with and Appendix of Original Papers*, 2 vols. \$6 *Lond.* 1772

This is a most curious and scarce work.

"The author was a man of strong sense, extensive knowledge, strict virtue, and sincerely attached to the liberties of his country. His qualifications for the embassy were such as seldom meet in any one man. Firm and independent, he disliked Cromwell for his selfish and ambitious views, and Oliver feared him on account of his integrity and popularity ; for his name gave a sanction to every measure in which he embarked." *Monthly Review*.

1998 Woolaston's (William) *Religion of Nature Delineated, fine head by Virtue, very scarce*, \$4 *Lond.* 1753
